

Putting the brain back into child psychiatry: recent insights

Professor Alasdair Vance
Head of Academic Child Psychiatry,
Department of Paediatrics,
University of Melbourne

Professor Alasdair Vance is the Head of Academic Child Psychiatry, Department of Paediatrics, University of Melbourne. His unit aids the clinical management of complex high and low prevalence child psychiatric disorders that present diagnostic difficulties and are often treatment non-responsive. His research interests are in the areas of high prevalence and high risk child psychiatric disorders, both pre- and post-puberty, and the psychiatric aspects of key paediatric neurological and endocrine disorders. He holds Honorary Academic Scholar positions with the Department of Child and Adolescent Psychiatry, Institute of Psychiatry, University College, London, United Kingdom and the Child Study Center, New York University School of Medicine, New York University, USA. He is an elected member of the International Society for Research in Child and Adolescent Psychopathology (ISRCAP).
