

Drug Use, Teenage Brain Development and Mental Health: Insights from neuroscience

Associate Professor Murat Yücel

Clinical Ph.D. (Neuropsychology) M.A.P.S.

Associate Professor in the Department of Psychiatry, The University of Melbourne.

Murat Yücel is currently appointed as a Research Leader in Neuroimaging at ORYGEN Research Centre and he also Heads the Impulsive-Compulsive Behaviour Research Group at the Melbourne Neuropsychiatry Centre. Since completing his PhD and professional training in Clinical Neuropsychology in 2001, Dr Yücel has been working in the field of neuropsychiatry. He has now produced over 100 publications (many in high impact journals) and his research into the nature of self/behavioural-control deficits in drug addiction and mental illness has received recent international recognition, in addition to local, national, and international media attention.
